

PRAGATI TIWARI

Python Developer | Backend Engineer | Data Analyst

Ahmedabad, Gujarat, India | +91 9054547557 | pragatitiwari1102@gmail.com

LinkedIn: linkedin.com/in/pragati-tiwari-549364215 | GitHub: github.com/pragati1102

PROFESSIONAL SUMMARY

I am Python Developer with 5+ months of hands-on internship experience designing and developing scalable backend systems using Python, Django, and REST APIs. Proficient in relational database design (MySQL, SQLite), role-based authentication, and MVT architecture. Skilled in data analysis using Excel, Power BI, Pandas, and NumPy with practical experience in machine learning (Linear Regression). Strong academic background with 9.59 CGPA in B.Tech Computer Engineering. Seeking an entry-level Software Developer or Data Analyst role at an MNC where I can contribute clean, efficient code and grow within an agile, collaborative environment.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, PHP

Web Frameworks: Django (MVT Architecture), CodeIgniter (MVC)

Databases: MySQL, SQLite, Relational Database Design, Query Optimization

Data Analysis & BI: Microsoft Excel (Advanced), Power BI, Pandas, NumPy, Data Visualization

Machine Learning: Linear Regression, Scikit-learn, Predictive Modeling, Data Preprocessing

Frontend Technologies: HTML5, CSS3, Bootstrap, Responsive UI Design

Tools & Platforms: Git, GitHub, VS Code, PythonAnywhere, Power BI Desktop, Microsoft Excel

Core Concepts: OOP, Data Structures, REST APIs, CRUD Operations, JWT Authentication, RBAC, Agile

PROFESSIONAL EXPERIENCE

Python Developer Intern – Maxgen Technologies

Dec 2025 – Apr 2026

Ahmedabad, Gujarat, India

- Developed and maintained backend modules using Python and Django, implementing secure JWT-based authentication and role-based access control (RBAC) for multi-user web applications
- Designed normalized MySQL and SQLite database schemas; optimized SQL queries and indexing strategies, improving data retrieval performance and reducing query execution time
- Built end-to-end CRUD operations and server-side form validation workflows following Django's MVT (Model-View-Template) architecture pattern
- Deployed production-grade web applications on PythonAnywhere, managing deployment configuration, environment setup, and database migrations
- Collaborated in an agile team environment, participating in code reviews and delivering features on schedule

Junior Backend Developer Intern – CodeFlix Web LLP

Jan 2023 – May 2023

Ahmedabad, Gujarat, India

- Developed backend systems and RESTful application logic using PHP (CodeIgniter MVC framework) and MySQL for dynamic, data-driven web applications
- Optimized database queries through restructuring and indexing, achieving a 15% reduction in server response time and improving overall application performance
- Built responsive, cross-browser-compatible UI components using HTML5, CSS3, and Bootstrap; implemented dynamic dashboards with CRUD operations

PROJECTS

Bookly – Full-Stack E-Commerce Book Platform

2025 – 2026

Technologies: Python, Django, MySQL, Bootstrap, JWT, PythonAnywhere

- Designed and developed a full-stack e-commerce platform enabling writers to publish books and customers to browse and purchase securely; implemented role-based access for three user personas: Admin, Writer, and Customer
- Integrated JWT-based user authentication and authorization, built a comprehensive admin panel for managing users, books, and orders, and implemented a real-time order tracking system
- Optimized backend performance with efficient database integration; successfully deployed on PythonAnywhere with responsive UI — Live: <https://ebookly.pythonanywhere.com/>

Salary Prediction – Machine Learning Model

2025

Technologies: Python, Scikit-learn, Linear Regression, Pandas, NumPy, Excel, Power BI

- Built an end-to-end machine learning pipeline to predict employee salaries based on years of experience, education level, and job role using Linear Regression
- Performed data cleaning, feature engineering, and exploratory data analysis (EDA) using Pandas and NumPy; used Excel for initial data profiling and Power BI for visualization dashboards
- Evaluated model performance using R-squared (R²) score and Mean Squared Error (MSE); achieved strong predictive accuracy and documented findings in a structured analysis report

Hotel Management System (HMS)

2024 – 2025

Technologies: Python, Django, MySQL, SQLite, Bootstrap

- Developed a comprehensive hotel management web application supporting room booking, check-in/check-out management, user account management, and scheduling operations
- Built a full-featured admin dashboard with CRUD functionalities for room and reservation data; implemented efficient database management using both MySQL and SQLite

EDUCATION

Bachelor of Technology (B.Tech) – Computer Engineering

2023 – 2026

Silver Oak University, Ahmedabad, Gujarat | CGPA: 9.59 / 10.0

Diploma – Computer Engineering

2020 – 2023

Silver Oak University, Ahmedabad, Gujarat | CGPA: 9.96 / 10.0

CERTIFICATIONS

- SAP Advanced Business Application Programming (ABAP) – Edunet Foundation
- Web Development in PHP – CodeFlix Web LLP Pvt. Ltd.

KEY ACHIEVEMENTS

- Maintained a 9.59 CGPA in B.Tech and 9.96 CGPA in Diploma – consistently in top academic percentile
- Deployed a live full-stack e-commerce application (Bookly) used by real users on PythonAnywhere
- Delivered a 15% improvement in server response time through targeted database query optimization during internship at CodeFlix Web LLP
